

Hahnemann's Homeopathy

by Ewald Stöteler

Education in the practical medicinal application of homeopathic remedies
according to the guidelines of Samuel Hahnemanns books;
6th edition of the Organon and his grand Manuel 'the chronic diseases'

Introduction

We have developed this e-learning trajectory based on the request by several participants on our seminars en webinars.

This request was based on the feeling of incompetence and insufficient knowledge of the basic works of the founder of homeopathy Samuel Hahnemann.

During this E-Learning process we are dealing with all the topics that we have all heard of but lack knowledge of the real essence and subsequently of the practical inclination and application.

In this PowerPoint we present a brief impression of the lay-out and lessons.

Hahnemann's Homeopathy

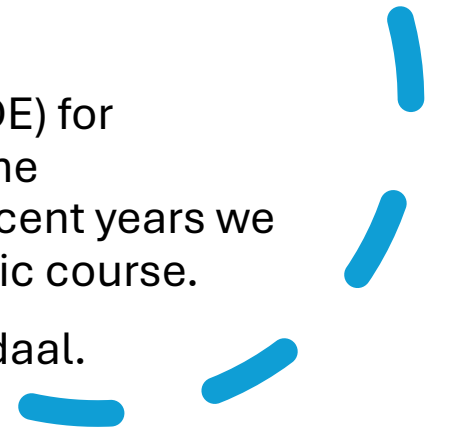

by Ewald Stöteler

Introduction

Description

The international e-learning program (NL-ENG-DE) for colleagues who wish to further their training in the Hahnemannian Classification of Diseases. In recent years we have received many requests for a thorough basic course.

Developed by Ewald Stöteler and Marja Roozendaal.

you can register here

Make 5 repertorisations of the different remedies we learn in this lesson

You only repertorise the exogenous symptoms.

Submit your
repertorisations. We are
in the petal?

A Calc.c baby one day old

A Silicea baby one day old

**Hahnemann's
Homeopathy**
by Ewald Stöteler

In this practice test, you are going to classify disease by symptoms.

each question, you have a number of options to choose from. Choose

I am very nauseous and throw up all the time due to the chemotherapy treatments

- incidents
- acute miasmatic
- epidemic
- iatrogenic
- hereditary
- STD
- degenerative
- constitutional

There are many cardiovascular diseases in the family

- incidents
- acute miasmatic
- epidemic
- iatrogenic
- hereditary
- STD
- degenerative
- constitutional

I have a lot of muscle problems because of the simvastatin tablets

- incidents
- acute miasmatic
- epidemic
- iatrogenic
- hereditary

Hahnemann's Homeopathy

by Ewald Stöteler

Posology 2.0

But it is also important;

Similarity

In these lessons you will learn what to look out for so that your prescription in EVERY area resembles the complaints, counselling, your prescription, etc. It's a matter of practice, lots of practice to gain experience and develop the sense.

Each year we will deepen our philosophy and each day of the course you will find that posology is always on the agenda. In the near future, try to fish out the posology parts from the lessons. Just develop your own acuity in this area and point out in your study group which posology parts you have heard. Compare them with each other, is that clear? Ask your questions about this in the next lesson. A similar prescription means similarity on all levels;

Hahnemann's Homeopathy

by Ewald Stöteler

- similarity of the remedies to be prescribed; intermediate remedy - nosode - herbal/animal/mineral remedy
- similarity in posology; the dynamics of being ill; how often to shake? how often to use? what order?
- similarity with the sensitivity of the patients.
- similarity with the responsiveness of the patient.
- similarity in patient management

**Hahnemann's
Homeopathy**
by Ewald Stöteler

You can start at any time

We are convinced that these 4 modules are the thorough basis for making working according to disease classification your own in practice.

Applying Hahnemann's homeopathy in all its facets.

In addition to the philosophy, all modules contain many practical applications that you can already use in your own practice.

We hope you will go through the modules with as much enthusiasm as we have put them together.

Knowing that Hahnemann's homeopathy is the homeopathy of the future. It is up to us to pass it on in the right way, to apply the posology properly.

Together we can do much more than alone and it is so much needed in our time!
